

Signs and punctuation marks:

A crucial point in the written dakini texts are the beginning. Normally a initial „yig mgo mdun ma“ ༄ or a „zla tshe gnyis“ ༄ plus a „shad“ | are found in the upper left corner of a normal tibetan text. In the present pechas the „zla tshe gnyis“ are replaced by special signs and the shad's are replaced by the terma break „gter tsheg“ ༄ or ༄ in front of the „gter ma“ alphabet or text. These specific signs belong to the texts itself, not to the tertons (gter ston). In addition beside these marks exist a lot of different specific terton signs the „gter ston gter btags“.

Some examples written in the present pechas:
